

# MEET SODVADIYA

Passionate JavaScript Developer | Strong Foundation in Python

+91 8140532489 • meetsodvadiya004@gmail.com

## Summary

Passionate JavaScript and Python developer with 2 years of experience building scalable web applications and delivering pixel-perfect designs. Specialized in modern frontend technologies like React and Next.js, with strong expertise in JavaScript and a solid foundation in Python. Continuously learning and adapting to advanced frontend practices to deliver high-performance solutions for large-scale projects. Experienced in collaborating with freelance clients and committed to growing as a 10x developer through continuous improvement and innovation.

## Projects

### Mobile App Builder

- Lead the **end-to-end frontend development** of multiple SaaS products, including **BIS, Preorder, Low in Stock, and a Mobile App Builder** (similar to FlutterFlow).
- Architected and delivered the complete frontend of the **Mobile App Builder**, implementing **dynamic forms, Redux/Thunks state management, undo-redo functionality, live previews, and integrated code editors**.
- Developed **AI-powered features**, including **chatbot integration, AI-based form generation, and component suggestions**.
- Designed and implemented **plan-based and permission-wise UI rendering**, ensuring **role-specific feature visibility**.
- Built and maintained **6+ scalable projects** using **React, Next.js, and Python**, ensuring high performance and maintainability.
- Delivered **client-focused solutions**, including **B2B management portals, healthcare systems, and responsive landing pages** with **pixel-perfect design**.
- Improved maintainability by implementing **version-wise UI management** across multiple projects.

### RubixCRM

- **Designed and developed a full-featured CRM system** using **Next.js**, leveraging **Supabase services** for database, authentication, and real-time data handling.
- **Implemented a dynamic role-based permission system**, allowing admins to configure access levels, manage staff, invitations, and control workflow across the platform.
- **Built features for leads management, staff management, and invitation tracking**, enabling efficient team collaboration and client engagement.
- **Optimized UI/UX** for smooth workflow management, scalability, and enhanced user experience across dashboards and modules.
- **Set up CI/CD pipelines** integrating **Azure DevOps and Vercel**, enabling automated deployment, version control, and continuous delivery of updates.
- Ensured secure authentication, structured access, and maintainable code architecture for long-term scalability and performance.

## Experience

### CrawlApps

Surat, Gujarat, India

#### Frontend Developer

01/2024 - Present

- Worked as a Frontend Developer at Crawlapps, where I built and managed complete frontend dashboards, ensuring seamless UI/UX. Occasionally contributed to backend development using Node.js and Python.

### Freelance Developer

Surat, Gujarat, India

01/2023 - Present

- Worked as a Freelance Fullstack Developer, building and maintaining projects using MERN stack and Python, handling both frontend and backend code to deliver complete solutions."

## Education

### Veer Narmad South Gujarat University

Surat, Gujarat, India

#### Bachelor of Computer Applications

01/2021 - 01/2024
